

LCBO

Let's get together.

Transportation Traffic Report:

An update on global situations that may affect product flow.

Week of: December 19, 2023

GLOBAL PULSE

Israel

- The flow of freight out of Israel continues to be impacted by the conflict and further developments remain unpredictable during these exceptionally difficult times.

South America- Argentina and Chile

- Severe drought in the Panama Region continues to create a low water situation in the Panama Canal resulting in reduced vessel traffic and draft restrictions. This note is for awareness only as LCBO freight has not been impacted at this point.

Lastly, if the current piracy and violence issues in the Red Sea/Suez Canal region continue and the situation goes unresolved for any length of time, there will be a potential for service disruption. Some ocean carriers have started temporarily suspending service and/or altering their routes to avoid passing through the area. We will provide updates accordingly.

North America

- There are currently no North American port disruptions that are impacting LCBO orders.

U.S. PORTS

- Philadelphia – 7-day dwell
- New York/NJ – 7-day dwell

CANADIAN PORTS

- Halifax, NS- 5-day dwell
- Saint John, NB- 5-day dwell
- Montreal, PQ- 5-day dwell
- Vancouver, BC- 9-10 day dwell

This is a general information circular designed to alert members of the trade to global issues which may affect product flow. For detailed information regarding the status of product shipments please contact your Specialty Services Customer Service Representative or Inventory Manager.
